

## REMARKS

This amendment is filed to correct drawing informalities. The drawings were objected to because the signal lines being provided to filter circuit 8 and regulation device 7 were not labeled. Figure 1 has been amended to label the inputs to these signal lines and to correct the label for the demultiplexer ("DEMUX") 6. The drawing objection is believed to have been obviated. Withdrawal of the objection is respectfully requested.

Applicant believes that no new matter has been introduced in this amendment. Entry of the amendment is respectfully requested.

Respectfully submitted,

---
